Obstacle faced in Restaurant Industry

Losing hold on regular old customers

- Lacking Brand awareness among market & end customers
- Competitive Pressure

It's a simple, automated & long term solution to all the problems !

As the whole world is revamping digitally, build a Mobile App for your Food Business.

How It Works?

- Customer Places order from - **Customer App**
- Order received/accepted by- **Restaurant App**
- Delivery driver is being assigned for your order - **Restaurant App**
- Order picked up & delivered at your doorstep - **Delivery App**

Why Food Businesses Should Invest in Mobile App?

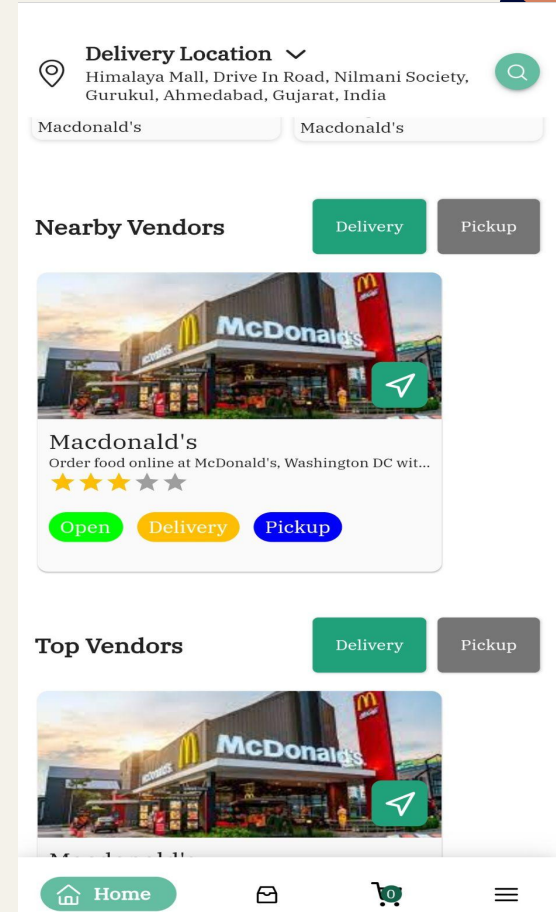

- Ease of doing business
- Increase efficiency with automation
- Seamless payment with various payment modes
- Real-time tracking of service, customer feedbacks, & quality
- Cutting-edge technologies for advanced level app brings automation that results into less human resources
- Periodic reports & analytics

Essential Features of Food Delivery App

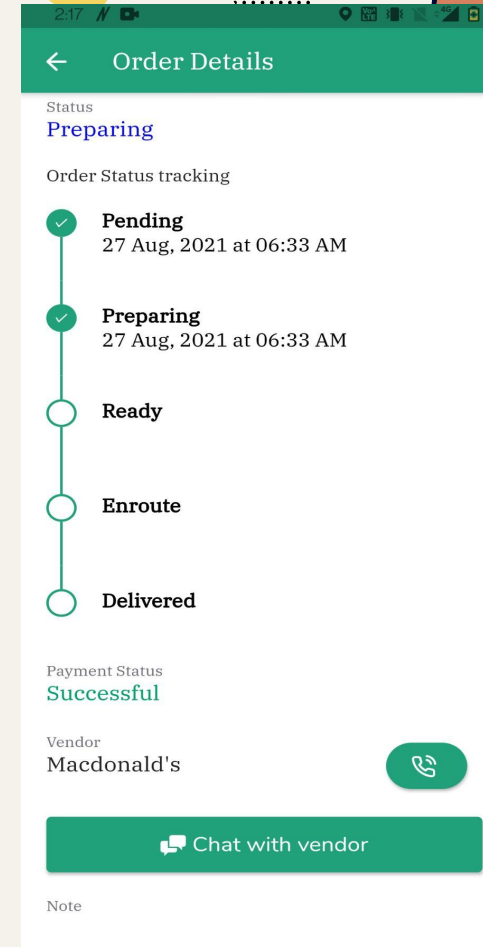

01. GEO-Location Based Restaurants Search

Setup up your delivery location and find wide range of nearby restaurants/dishes.

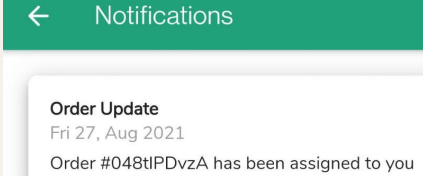

02. Real-Time Order Tracking

Customers/Restaurant Owners can track orders on the way to delivery using google map integrated using google map API.

04. Push Notifications

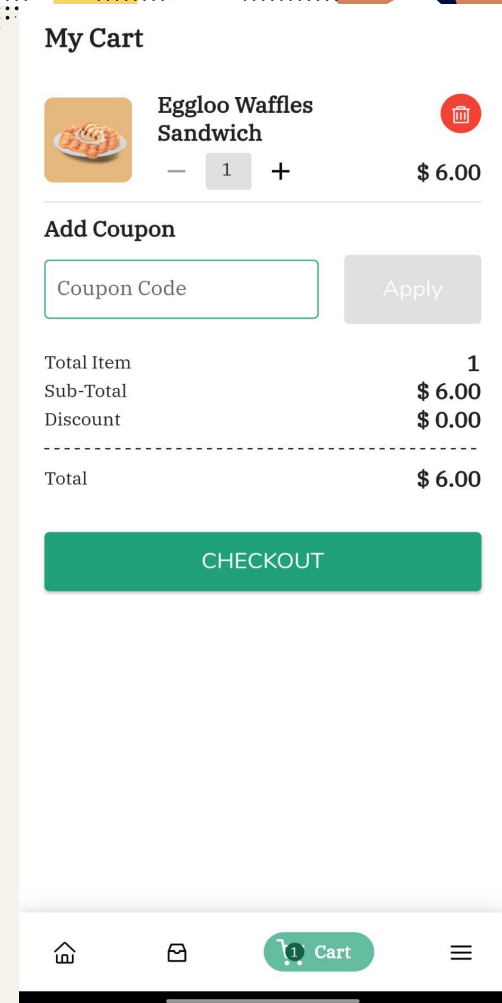

Turn on the app notification and get notified on order status, vendor offers & your app related updates on screen.

05. Discount, Rewards & Loyalty Points

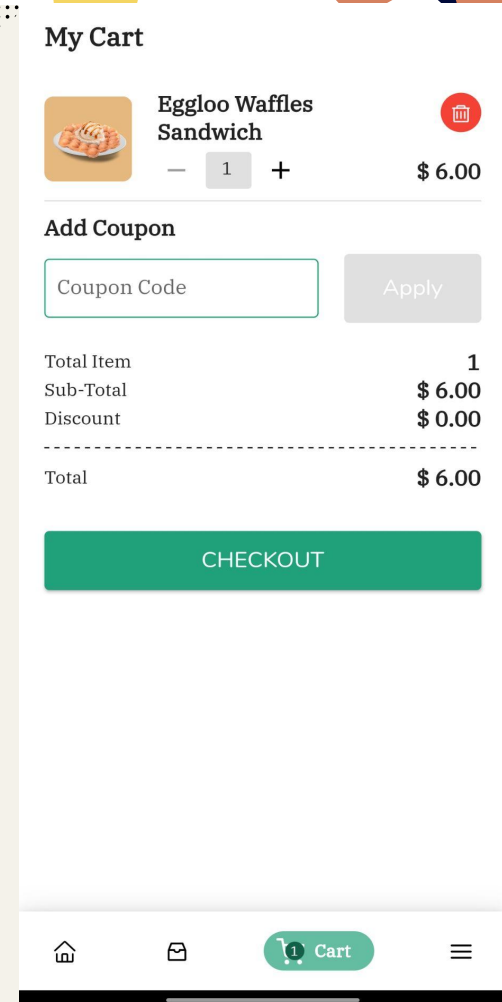

Apply promo codes at a time of check-out to get benefits of discounts.

Get Reward points for your loyalty towards food delivery app.

06. Easy Payment Option

Range of payment modes such as Google Pay, PayPal, Amazon Pay, iOS Wallet, Stripe, Credit/Debit Card, Online Banking and Cash On Delivery (COD) alternatives to ease of order placement.

07. Review & Rating

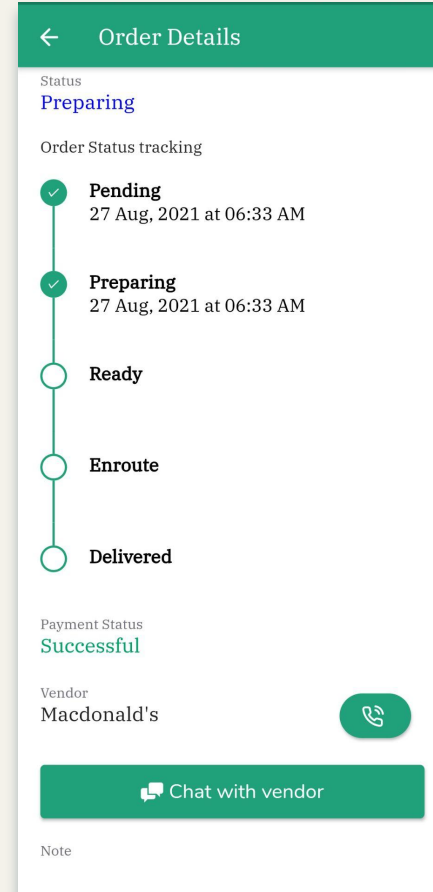

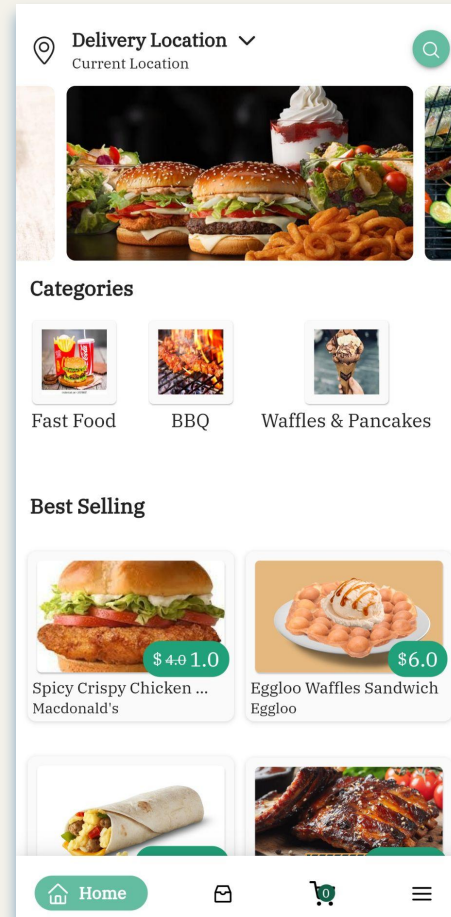

Get quality feedback on delivery service & restaurant food to help you improve quality & services.

08. Social Media Integration

Login to food app using social media accounts such as facebook, instagram, pinterest or google account made easy with social media integration.

Key Features of Customer App

- Nearby Restaurants/Dishes
- Promos & Coupon Codes
- Order Tracking
- Bookmark Items/Add to Favourite
- Multiple Payment Option
- Ratings & Reviews
- Contact Delivery Person/Restaurant
